South Slope Centrex

South Slope offers Analog and Digital Centrex Service. Centrex is a customer driven customized business telephone service that utilizes South Slope's central office switching to provide businesses with the most up to date technology. Customers do not have to provide space, maintain costly equipment or if you lease the phones from South Slope, telephone set repairs.

The Centrex Advantage

- Save money on line charges with a multi-year contract.
- Pricing does not change over the contract duration.
- Choose from the custom features available at no extra cost to personalize your complete system or individual telephones for efficient user friendly operation.
- Class features may be added at a nominal charge.

No Additional Costly Maintenance Contract

- When you lease your telephones from South Slope, we maintain the telephones at no charge for you.
- There are no expensive key systems or control equipment to purchase or maintain.

Saves Time and Money

- Customers can dial individuals or departments directly, reducing the number of calls answered by the receptionist or operator allowing them to concentrate on other projects.
- Allows remote locations to transfer calls between them without expensive dedicated lines or equipment.

CENTREX *pricing*

Centrex Lines (Minimum 4 Lines)

- 3 year Contract-\$13.50 per line
- 2 year Contract-\$19.00 per line
- 1 year Contract-\$25.25 per line
- No Contract-\$28.50 per line

\$9.20 end user & E911 charges apply

FEATURE *options*

Consultation Hold - Three Way Conference - Call Transfer: These three features work together. Consultation Hold allows the transferring party to talk privately with the destination before transferring the call, or establishing a Three Way Conference. These features are activated by pressing the conference key.

Hunting: A call completion feature that searches for an idle line to complete a call. The available lines can be defined in a hunt group.

Call Forwarding: Eliminates unanswered calls by forwarding them within a specified number of ringing cycles to a pre-programmed destination.

Call Hold: Hold a call manually on the loop by pressing the hold key and perform other tasks, originate another call, call pickup, etc.

Call Pickup: Allows a station to answer calls incoming to another station within a predetermined call pickup group.

Speed Call: Place calls to a designated list of frequently dialed numbers.

Ring Again: Monitor a busy directory number and notify the user when the called station becomes free. Notification can be by ring tone and/or the flashing of the Ring Again indicator.

Call Waiting: Incoming calls encountering a busy Meridian business set receives ringing while the called station receives call waiting notification consisting of two bursts of buzz tone (optional) or the call waiting lamp will flash. The Call Waiting key will connect you to the new party calling and place the other on hold.

Automatic Line: When a station goes off hook (for a predetermined time limit) a connection is automatically established to a predetermined location.

Call Park - Direct Call Park: Park a call against a directory number or another station number. The parked call can be retrieved by any station.

Last Number Redial: Redial the last number called from the phone.

Station to Station Calling: This feature allows calls to other stations without the use of an attendant by dialing a two through seven digit number.

Paging Access: This feature allows you to access a standalone paging system.

Conference 6: Activation of up to 6 conferees to be added on conference calls. This feature is activated by pressing the conference key each time a conferee is added.

Make Set Busy: This feature allows a station to be inactive and all incoming calls to receive a busy signal.
